

Are you OH & S compliant?

The Occupational Health and Safety (OH&S) Act 2004 imposes a duty of care on your company to provide a safe workplace. Failure to ensure the safety of workplace electrical appliances may make directors and owners liable for fines and compensation in the event of an accident. To comply, all portable electrical appliances that you own, lease or hire should be regularly tested.

Simon's Test & Tag Services can assist you by:

- Identifying any un-safe portable electrical appliances and removing them from service
- Reducing the risk of any electrical injuries to yourself, your staff and the general public
- Reducing the risk of electronic data loss from damaged and overloaded appliances

If you see my car driving past, give me a call to organise a free quote

Call Simon's Test & Tag now for a fast, efficient service

Our friendly service includes:

- On-site test & tag services across Melbourne.
- Using of specialised testing equipment in accordance with standards AS/NZS 3760:2010
- A free electronic tested appliance register that identifies passed and failed appliances.
- Photos to help identify any **FAILED** appliance on the tested appliance register.
- Testing all **240 volt** portable electrical appliances including: computers, printers, extension leads and power boards, portable fans and heaters, phone and laptop chargers, kitchen items such as toasters, kettles, fridges and microwaves and workshop electrical tools such as drills and circular saws.
- Test **3 phase** portable equipment in workshops, factories and restaurant kitchens.

*Test and tagging is a four step (inspect, test, tag & record) safety check of your workplace portable electrical appliances. It can be incorporated into your risk assessment and is designed to help identify any electrical safety hazards in your workplace. A tag is then fitted to all appliances that pass any **FAILED** appliances are removed from service immediately.*

Is your workplace electrically safe? Don't let the answer shock you!
